EDUCATION

Noida Institute Of Engineering And Technology, Greater Noida **2023 – 2027**
B.Tech - Computer Science and Engineering (AIML) - ***CGPA: 8.56*** *Greater Noida, Uttar Pradesh*

EXPERIENCE

HCLTech — AI & ML Project-Based Intern **March 2026 - June 2026**
Project-Based Internship Program *NIET, Greater Noida*

- Gained hands-on experience in AI/ML concepts and real-world applications.
- Developed AI/ML projects involving preprocessing, model training, and evaluation.
- Applied Python and ML techniques to build and implement practical solutions.

PROJECTS

Multi-Agent AI Research System - ResearchBot | Python,FastAPI,React,LangChain, Tavily,Mistral

- Developed a multi-agent AI research assistant for automated topic exploration, source extraction, and structured report generation.
- Built an agentic workflow that performs web search, webpage scraping, report writing, and critique generation using LangChain and LLM APIs.
- Deployed the full-stack application on Render with a live public demo and added basic request throttling and input validation for safe public access.

ScanDeck-AI-Powered Website Audit and Optimization Tool | React,JS,Bootstrap,Node,Express,API

- Built a full-stack website audit tool that analyzes any URL using Google PageSpeed Insights and displays Performance, SEO, Accessibility, and Best Practices scores with prioritized issues.
- Integrated Gemini AI through a secure Express.js backend to generate practical, plain-English recommendations for performance fixes and Core Web Vitals optimization.
- Developed a responsive React and Bootstrap interface with URL validation, recent scan history, loading/error handling, and audit insights for faster debugging and website optimization.

Confidence-Aware Answer Verification System | Python,PyTorch,HuggingFace,Gradio,NLI

- Built a Confidence-Aware Answer Verification System that evaluates whether answers are supported by context using a hybrid pipeline combining QA models, semantic inference, and lexical matching.
- Designed a multi-signal confidence scoring mechanism (semantic + lexical + QA agreement) to detect hallucinated or unsupported responses.
- Developed a lightweight web application (Gradio + Hugging Face) enabling real-time answer verification, hallucination detection, and multi-answer ranking.

TECHNICAL SKILLS

Languages: Java, Python
Web & Backend: HTML, CSS, JavaScript, Bootstrap, Node.js, Express.js, EJS
Databases: MySQL, MongoDB
Concepts: REST APIs, CRUD Operations
Core CS: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, OOPs
AI/ML: Machine Learning, Deep Learning, NLP,Generative AI, RAG , LLMs
Developer Tools: Git, GitHub, VS Code, Google Colab, Kaggle, Jupyter Notebook, Hugging Face

TECHNICAL ACHIEVEMENTS AND CERTIFICATIONS

- Solved 400+ DSA problems across LeetCode, GeeksforGeeks and Codeforces.
- **Research Paper Accepted with Major Revision – CISES 2026 (G.L. Bajaj, 2026): "Hybrid ResNet50–CNN Transfer Learning Model for Multi-Class Chest X-Ray Disease Classification."**
- DSA Alpha Plus - Apna College
- Smart India Hackathon 2025 Participant.
